PREFACE

COMMENCING with the Session 1884-5 the names and addresses of the graduates were shown in the Calendars of the School of Practical Science and later the Faculty of Applied Science and Engineering, until the Session 1922-3, when the practice was discontinued. In the Session 1923-4 the Council requested that the names of the graduates be published in such a form as the University authorities could arrange.

Previous to 1892 the course in the School of Practical Science was of three years duration, and in the Session 1892-3 a fourth year, or post-graduate course, was introduced, leading to the B.A.Sc. degree, and was optional until the Session 1909-10, when the three year course leading to the diploma was discontinued and four years were obligatory; consequently there were no graduates in 1912. Previous to 1912, where a graduate took the B.A.Sc. degree, but entered on the diploma course, he is shown in the year in which he received his diploma.

The numbers as shown in front of the names indicate the departments as they were numbered in recent years, and not the departments as they were known in the earlier years.

An index of names of graduates arranged alphabetically will be found at the back of this volume.

Graduating departments are represented as follows:

1. Civil Engineering.
2. Mining.
3. Mechanical.
4. Architecture.
5. Analytical and Applied Chemistry (discontinued, 1921).
6. Chemical Engineering.
7. Electrical.
8. Metallurgical.

Up to and including 1911, 3 represented the combined departments of Mechanical and Electrical Engineering.

Graduates are requested to inform the Secretary of the Faculty of changes in their addresses.
